ABOUT COMPANY

Eco Processing is one of the most credible uPVC Windows Manufacturer in Bangalore, Karnataka. We deal with the entire range of available uPVC Doors and Windows and guarantee the best product available in the market.

Eco Processing doors and windows can instantly give any room a face lift, not only do they look great but provide insulation against noise, dust, rain pollution and rising energy costs making them ideal for all ideal living condition. They are also easy to install and can be used to change the character of any room extend it or bring in more light.

SOME HIGHLIGHTS OF ECO PROCESSING

Eco Processing was established in 2015 Situated in Singasandra, Hosur Main Road, Bangalore. We consists of 34 employee working in our company, within premises 15 employee with 1 supervisor 2 Marketing person and rest are in the field for site installation.

We have completed almost 8 Lakhs square feet of window installations as on 2018 and on an average from the past 2 years we are doing 2.5 Lakhs square feet window installation every year. We are now partnered with Eagle Industries Situated in Coimbatore, TN., and making our own brand (ECO PRO) of uPVC Lead free profile which gives 10 years of warranty. We make sure that we follow all standard Procedure and guideline for making uPVC profiles.

PRODUCT FEATURES

DURABILITY

ECO PRO window offers you the A one quality products which have undeniable warmth, high-end appearance and a long lasting life. They do not promote any issues which are related to warp, split, rot, crack or decay. Our windows are the best energy efficient windows which come for many years.

SOUND INSULATION

The ECO PRO windows are typically made of multiple layers of glass which limits the sound that crosses the windows. And our this sound insulation would be an effective and aesthetically pleasing solution.

BUG MESH OPTIONS

In order to keep our customer away from the dangerous bugs and the diseases they can bring, we at ECO PRO offer you the best quality bug mesh which can let you open your doors and windows all the time and get fresh air and enough sunlight in.

SAVES ON BILLS

ECO PRO windows are the designed with latest technology and aesthetic designs which make them more desirable and economical by saving interior energy and reducing the maintenance and energy cost.

INDOOR AIR QUALITY

ECO PRO provides the comfortable and healthy indoor environment which can save up your energy and its costs. These are designed in such a way that they can limit the heat and unfavourable temperature from outside and avoid loss of internal energy.

FIRE RETARDANT

ECO PRO windows are fire retardant which can reduce the flammability of fuels or delay their combustion. They are able to slow down the intensity and stop the spread of the fire.

UV RESISTANCE

UV rays are responsible for the most of the damage of the windows and doors. The windows are designed in such a way that they are better able to resist the UV rays and keep it unspoilt. In fact they are 100% resistant to such rays.

PERSONALISED DESIGNS

We let the customers ideas and dreams come true, by getting the products personalised.

MAINTENANCE FREE

The windows are designed to be appropriate for any rough use. They are dirt and dust resistant which would be convenient to maintain at homes.

CORROSION RESISTANT

The rust is the enemy of the metals. We have used incredible and the toppest quality designs and materials which are 100% free from corrosion.
